CS405 Assignment 2

Tolga Aydın 27843

In homework its written we shouldn't touch to html file and we should write our changes in .js file. In our js file our frag color is given with vector and RGBA inside of it.

In RGBA we know R is for Red, G is for Green, B is for Blue and A is for Alfa(Opacity). In our vector for the vector RGBA is given (1.0,0.0,0.0,1.0) which make its Red since Red value is 1 and the others is 0. So for make it blue I gave Red as 0 and Blue as 1 which is(0.0,0.0,1.0,1.0) and I didn't want to change opacity.
